PROFILE

Holding a bachelor's degree in computer science, with experience in web and mobile development using Dart, Flutter, Firebase, C#, ASP.NET, JavaScript, and SQL Server. Having successfully completed several internships and projects, I am passionate about innovation and continuous learning.

PROFESSIONAL EXPERIENCE

SOFTIC – Software Intelligence Company

2021

Software Developer Intern

Lac 2, Tunisia

- Developed an Employee Management web application to manage employee records and administrative operations.
- Implemented CRUD functionality, data validation, and business logic using ASP.NET and C#.
- Designed and managed SQL Server databases for storing and retrieving employee information.
- Built responsive user interfaces with DevExpress and JavaScript.
- Collaborated with the development team to maintain, test, and improve application features.

Technologies: ASP.NET, C#, SQL Server, DevExpress, JavaScript

SOFTIC – Software Intelligence Company

2022

Software Developer Intern

Lac 2, Tunisia

- Developed a Contact Management web application for managing company contacts and events.
- Implemented CRUD operations and business logic using ASP.NET and C#.
- Designed and managed data storage with SQL Server.
- Built user interfaces using DevExpress and JavaScript.
- Participated in testing, debugging, and maintaining application features.

Technologies: ASP.NET, C#, SQL Server, DevExpress, JavaScript

Bee Coders Center

2023

Mobile Application Developer Intern

Lac 1, Tunisia

- Developed a Notes Management mobile application that allows users to create, edit, organize, and delete notes.
- Implemented user authentication and cloud data storage using Firebase.
- Built a responsive and user-friendly interface with Flutter and Dart.
- Integrated real-time synchronization between the mobile application and Firebase Cloud Firestore.

Technologies: Dart, Flutter, Firebase (Authentication, Cloud Firestore)

Internship at Software intelligence company "SOFTIC"

10/2024 – 06/2025

Concept and development of a medical management mobile application

Lac 2, Tunisia

- Patient management module:
Add/edit and delete patients with search functionality.
- History system (medical history)

Structured entry for chronic diseases, surgeries and family history.

- Automate appointment scheduling: Create, edit and view appointments
- Monitor patient workflow: Implement real-time status tracking for each patient (e.g. waiting room, in consultation, consultation completed) to optimize the efficiency of the application.

Technologies: Flutter, Dart, Firebase

PROJECTS

Wallpaper App (Flutter)

- Built a modern Android wallpaper app using Flutter with Clean Architecture
- Integrated APIs (Pexels) to display high-quality wallpapers
- Implemented core features: browse, preview, download, set wallpaper, and favorites
- Used Flutter Bloc (Cubit) for state management and optimized performance with caching

EDUCATION

BTP in IT management

2019 – 2021

IMSET - Institut Maghrébin des Sciences Économiques et Technologiques

BTS in IT solution developer designer

2021 – 2023

IMSET - "Institut Maghrébin des Sciences Économiques et Technologiques" has a partnership with
CNAM - "Conservatoire national des arts et métiers".

TECHNICAL SKILLS

- **Programming:** Dart, Javascript, C#
- **Frameworks:** Flutter, ASP.NET
- **Databases:** Firebase, SQL Server, MySQL
- **Tools:** Git, Github, CI/CD

LANGUAGES

- Arabe : Native
- English : B1
- French : A2
